March 11th, 2026

To All Atlas Air Customers:

NOTICE OF FUEL SURCHARGE INCREASE

Dear Valued Customer,

Due to the steep and sudden rise in aviation fuel prices driven by the ongoing geopolitical environment, we would like to inform you that Atlas Air will be increasing the fuel surcharge for our South America network. Given the volatility in the current environment, fuel surcharge levels may be reviewed and updated more frequently and may adjust upward or downward accordingly. Commencing with shipments departing on or after March 16th, the fuel surcharge will be as follows:

Colombia to U.S. from \$0.15 to \$0.20 per kg., MIN \$10.00.

Colombia to Europe from \$0.40 to \$0.60 per kg., MIN \$15.00.

The surcharge will apply to all Air Waybills flown as of the implementation date, based on the chargeable weight of the shipment.

We thank you for your continued support.
